HUGO Scaffolds

Experts in Scaffolds & Ladders

ABOUT US

HUGO Scaffolds is a construction firm based in Nairobi Kenya. Established in 2015, we seek to improve buiding solutions by providing reliable products that are suitable for small and large scale constructions.

Our business has grown through self reliance and client referrals and we appreciate the progress thus far. Our differentiator is excellent quality service at an affordable rate.

HUGO Saffolds brings quality , secure and reliable products guaranteed to make construction easier and safe. We hire the following:

- Scaffolds [All with perforated platforms]
- Mobile Scalffolds/ Rolling Tower
- Shoring Props/ Jacks
- Aluminum Ladders

Our products are available at affordable rates enabling customers complete their building projects in a safe and trusted manner. We pride ourselves in building trustworthy partnership with our customers.

Having been sourced from Germany, our products are safe, of high quality and therefore meet all required intarnational standards.

We do not charge for erecting and dismantling of our materials as we offer a full-package of service so that we can ensure our clients a safe and secure working enviroment. The quality of our pruducts and the safety of our clients in their working enviroment is at the core of our business products.

FACADE SCAFFOLD

Our Scalffolding system is easy to set up and ensures a stable and solid construction.
Features and advantages include:

FAST SET UP
Fast and easy set up has been achieved thanks to the use of prefabricated components.

SAFETY
A perforated surface of steel platforms minimizes the possibility of slipping and facilitates the removal of rainwater.

STABILITY
A rigid sructure with diagonal bracings makes it possible to carry heavy loads.

SHORING PROPS/ JACKS

Our props satisfy every need of props and in particular for the casting of slabs. Thanks to the characteristics of use, sturdiness and and high load capacity, the props are suitable for all formworks systems, slabs and all fixed heads and drop heads related to every system.

Product features:

- Hand shearing proctetion and pipe slipping prevention
- Easy to use and feasible in height with millimetric accuracy
- Available in different heights [1,80m - 4,10m]
- Safe to use due to constant high load capacity of at least 20kN to 30kN depending on the length of the prop
